SUBJECT INDEX TO VOLUME 178

ABDOMEN
aneurysms, aorta, inflammatory, presentation and management of, 573
closure, temporary, simplified, with latex rubber and Marlex mesh, 512
surgery, hysterectomy, modified McCall culdoplasty, technique, 507
prior, peritoneal dialysis catheters, laparoscopic placement of, 515
single-dose ceftizoxime versus multiple-dose cefoxitin, as prophylaxis for, results of double-blind, placebo-controlled clinical trial of, 123
wall, repair, with expanded polytetrafluoroethylene, reherniation after, 613
Aneurysms
abdominal, aortic, inflammatory, presentation and management of, 573
aortic, abdominal, inflammatory, presentation and management of, 573
Antibiotics
bioavailability, experimental, in acute pancreatitis, 475
prophylactic, single-dose cefuroxime versus multiple-dose cefazolin, for high-risk cholecystectomy, 321
Anus
fissure, chronic, surgery, morbidity, and pathogenesis of, critical appraisal of, 600
Aorta
abdominal, aneurysms, inflammatory, presentation and management of, 573

BILIARY TRACT
ducts, hilar, tumor, portal embolization for, radical operation after, 480
injury, during laparoscopic and conventional cholecystectomy, 229
roentgenography, laparoscopic, through gallbladder, 175
surgery, in relation to ducts, extrahepatic, endoprostheses, effects of, experimental, 343
Blood
antibiotics, immunoglobulins, thyrotropin binding inhibitor, and appearance of intrathyroidal lymphocytes, at subtotal thyroidectomy, for Graves' disease, 589
circulation, extracorporeal, as blood conservation technique, for extensive pelvic operations, 397
coagulation, and fibrinolysis, in hepatic resection, effect of nafamostat mesilate on, 498
anti-, versus intracaval interruption, deep venous system after, status of, prospective comparison of, 220
hyper-, an evolving risk for spontaneous venous and arterial thrombosis, 266
regulating, changes in, in hepatic resection, with special references to soluble thrombomodulin and protein C, 65
dialysis, grafts, access, composite, 24
hemo-, graft salvage, 431
fibrin, fibrinolysis, and coagulation, in hepatic resection, effect of nafamostat mesilate on, 498
hemodialysis, access, cephalic vein, double lumen Silastic catheter for, placement of, 171
hemodynamics, stability, intraoperative, and early graft function, flushing with autologous blood improves, in clinical hepatic transplantation, 541
inoculation, quantity of, in needlestick injury from suture needles, 107
lymphocytes, intrathyroidal, appearance of, and thyrotropin binding inhibitor immunoglobulin, at subtotal thyroidectomy for Graves' disease, 589
protein C, and soluble thrombomodulin, special references to, and changes in regulating coagulation in hepatic resection, 655
Blood vessels
arterial, occlusion, catheter induced, angiographic, 439
arteries, coronary, revascularization, repeat, internal mammary artery for, 245
hepatic, reconstruction, experimental, in hepatic transplantation, sleeve anastomosis of, secured technique of, 622
infrainguinal, grafts, bypass, patency, influence of graft types on, 155
mammary, internal, conduit, safe, for repeat coronary revascularization, 245
popliteal, entrapment, natural history of, 553
proximal, lateral approach, for popliteal to anterior tibial artery bypass, 76
surgery, bypass, popliteal to anterior tibial artery, lateral approach to proximal popliteal artery for, 76
thrombosis, and venous, spontaneous, hypercoaguable states, as evolving risk for, 266
tibial, anterior, popliteal to, bypass, lateral approach to, 76
exclusion, extended left hepatectomy with, 288
grafts, portal vein, in living related hepatic transplantation, 297
salvage, hemodialysis, 431
occlusion, hilar lobar, for hepatic resection, 6
veins, cephalic, access, hemodialysis, double lumen, Silastic catheter for, placement of, 171
portal, cannulation, *in situ*, harvesting of liver without, 626
embolization, for tumor of hilar bile duct, radical operation after, 480
graft, in living related hepatic transplantation, 297
presacral, bleeding, controlling, methods of, 183
system, deep, status of, after intracaval interruption versus anticoagulation, prospective comparison of, 220
thrombosis, and arterial, spontaneous, hypercoaguable states, as evolving risk for, 266
vena cava, interruption, versus anticoagulation, deep venous system after treatment with, status of, prospective comparison of, 220
retrohepatic, revise, of reduced size orthotopic hepatic grafts, use of vascular stapler, 181
Breast
aspiration, fine needle, stereotactic, of lesions of, 54
stereotactic, biopsy, of nonpalpable nodules of, 17
biopsy, lesions, nonpalpable, needle localized, improved method of, 548
stereotactic aspiration, of nonpalpable nodules of, 17
cancer; carcinoma, bilateral, prognosis of, 111
contralateral, occurrence and prognosis, 390
diagnosis, biopsy localization, needle, and screening mammography, five-year survival of, 427
1991 national survey, by commission on cancer, 213
nonpalpable, roentgenologic characteristics and risk factors for multivariate analysis of, 149
in postmenopausal hormone user, and nonuser control groups, 167
suspicion, prone scintimammography in, 491
fistula, lactiferous, 29
lesions, mammographic, stereotactic fine needle aspiration of, 54
nonpalpable, biopsy, localized, needle, improved method of, 548
nipple, discharge, management of, 471

fistula, lactiferous, 29
nodules, nonpalpable, biopsy, stereotactic aspiration of, 17
roentgenography, lesions, stereotactic fine needle aspiration of, 54
screening, and needle-localization biopsy, for carcinoma of, five-year survival, 427
Burns
thermal, acute phase, wound size, interleukin-2 and -6 in relation to, 357

CALCIUM
oral, supplements, to enhance early hospital discharge, after bilateral surgical treatment of thyroid gland, or exploration of parathyroid glands, 11
Cancer
breast, carcinoma, bilateral, prognosis of, 111
carcinoma, contralateral, occurrence and prognosis, 390
diagnosis, by screening mammography and needle-localization biopsy, five-year survival, 427
1991 national survey, by commission on cancer, 213
nonpalpable, roentgenologic characteristics and risk factors for, multivariate analysis of, 149
in postmenopausal hormone user, and nonuser control groups, 167
suspicion, prone scintimammography in, 491
prognosis, contralateral, occurrence and prognosis, 390
colon, carcinoma, and rectum, metastases from, detected in small lymph nodes, by clearing method, 223
diagnosis, breast, carcinoma, by screening mammography and needle-localization biopsy, five-year survival, 427
esophagus, carcinoma, and surgery, recent advances in, 363
esophagus, carcinoma, diagnosis, and surgery, recent advances in, 363
liver, carcinoma, hepatocellular, small, transplantation, role of in, complicating cirrhosis of liver, 379
metastases, detected in small lymph nodes, by clearing method from carcinoma of the colon and rectum, 223
ovary, carcinoma, tumor recurrence in, detection of, magnetic resonance imaging for, diagnostic value of, 239
periampullary, carcinoma, resectable, and unresectable, comparison of, 369
prognosis, and occurrence, of contralateral carcinoma of breast, 390
rectum, carcinoma, and colon, metastases, detected in small lymph nodes, by clearing method, 223
carcinoma, resection, curative, long term survival after, 271
surgery, using tissue expander, in association with pelvic partition, to prevent dysfunction of bladder, 300
stomach, carcinoma, lymph node staging and presumed benefit of lymphadenectomy, in patients with, 38
surgery, and diagnosis, in carcinoma of esophagus, recent advances in, 363
survival, five-year, breast, carcinoma, diagnosed by screening mammography and needle-localization biopsy, 427
long term, after curative resection for carcinoma of rectum, 271
Cannulation
portal system, *in situ*, harvesting of liver without, 626
Catheters
arterial, occlusion, induced, angiographic, 439
implanted, totally, in gynecologic oncologic patients, long term experience with, 164
lumen, double, Silastic, placement of, for hemodialysis access through cephalic vein, 171
peritoneal dialysis, in prior abdominal operations, laparoscopic placement of, 515
Collective review
Carcinoma of proximal bile duct, 97
Gastrointestinal neuroendocrine tumors, 187
Hystereoscopic resection of uterus septus versus abdominal metroplasty, 637
Management of penetrating trauma to urinary tract, 417
Pulmonary failure and production of leukotrienes, 309
Review and current perspectives of cutaneous malignant melanoma, 523

DIAPHRAGM
pediatric, in acute gastric volvulus, 234
Disease
Graves', subtotal, thyroidectomy for, thyrotropin binding inhibitor immunoglobulin, and appearance of intrathyroidal lymphocytes at, 589
Drugs
cefazolin, multiple-dose, versus single-dose cefuroxime, as prophylactic therapy, for high-risk cholecystectomy, 321
cefoxitin, multiple-dose, versus single-dose ceftizoxime, as prophylaxis for vaginal and abdominal hysterectomy, 123
ceftizoxime, single-dose versus multiple-dose cefoxitin, as prophylaxis for vaginal and abdominal hysterectomy, results of double-blind, placebo-controlled trial of, 123
cefuroxime, single-dose, versus multiple-dose cefazolin, as prophylactic therapy, for high-risk cholecystectomy, 321
immunosuppressive, cyclosporine, and new patterns of transplant nephrectomy in, 59

EDITORIAL
New directions for Journal, 73
Endoscopy
fetal, experimental fetoscopy-guided, 609
vesical neck and uterovaginal suspension, for cystocele prolapse repair, 326
Esophagus
cancer; carcinoma, diagnosis, and surgery, recent advances in, 363
surgery, transhiatal, indirect laryngoscopic evaluation of vocal cord function in, 605
resection, without thoracotomy, with vagal preservation, 83
Extremities
perfusion, normothermic, isolated, recurrence-free interval and survival, in patients with recurrent melanoma of, 654
tumor, melanoma, recurrent, recurrence-free interval and survival in, treated with normothermic isolated perfusion, 564

GALLBLADDER
excision, and cystic duct, conventional, and laparoscopic, bile duct injury during, 229
laparoscopic cholangiography through, 175
surgery, mini-, technical aspects of, 624
removal, high-risk, prophylactic therapy for, single-dose cefuroxime versus multiple-dose cefazolin, 321
Gastrointestinal tract
appendix, inflammation, chronic and recurrent, uncommon entities, often misdiagnosed, 385
volvulus, acute, pediatric diaphragm in, 234
Gynecology
contribution to intestinal obstruction in female, 617

HEART
and lungs, surgery, bypass, bleeding, persistent, pack and close approach, 353
Hernia
cystic, prolapse, repair, suspension, endoscopic vesical neck and uterovaginal, 326
inguinal, aponeurotic, repair, biochemical study, 595
re-, after repair of abdominal wall with expanded polytetrafluoroethylene, 613
Hormones
effects, in postmenopausal user and nonuser control groups, carcinoma of the breast in, 167
Hospitals
discharge, early, to enhance, oral cal-

cium supplements, after bilateral surgical treatment of thyroid gland, or exploration of parathyroid glands, 11

INSTRUMENTS AND APPARATUS
drains, and tubes, secure, technique, one-handed, simple, 632
filter, Greenfield, clinical experience with, and new technique for operative insertion, 117
needle, biopsy, localized, breast, lesions, nonpalpable, improved method of, 548
suture, injury, needlestick, blood inoculation in quantity of, 107
stapler, skin, for low anterior resection, distal rectal stump, edge, pursestring suture, placement, technique, new, improved, 404
technique, for hepatic resection, 510
vascular, use, to revise retro hepatic vena cava, of reduced size orthotopic hepatic grafts, 181
stereotactic fine needle aspiration, of mammographic lesions, 54
tubes, and drains, secure, technique, one-handed, simple, 632
feeding, nasoduodenal, placement, bedside, technique, modified, 407
jejunostomy, percutaneous, direct, placement, technique, 173
ultrasound, guided biopsy, of nonpalpable and difficult to palpate thyroid masses, 33
Intestines
anastomosis, ileorectal, experimental, total colectomy with, defecation mechanisms, in conscious dogs after, 249
cancer; carcinoma, colon and rectum, metastases from, detected in small lymph nodes, by clearing method, 223
rectum, long term survival after curative resection for, 271
surgery, using tissue expander, in association with pelvic partition, to prevent dysfunction of bladder, 300
colon, cancer; carcinoma, and rectum, metastases from, detected in small lymph nodes, by clearing method, 223
excision, total, experimental, with ileorectal anastomosis, defecation mechanisms, in conscious dogs, 249
irrigation, and rectum, distal, controlled, efficient system for, 305
diverticulum, duodenal, clinical significance of, 257
duodenum, ampulla of Vater, peri-, cancer; carcinoma, resectable and unresectable, comparison of, 369
diverticula, clinical significance of, 257
incision, and pancreas, pylorus preserving, and standard Whipple procedure, long term results, comparison of, 443
naso-, tubes, feeding, placement, bedside, technique, modified, 407
ilium, anastomosis, and rectum, experimental, with total colectomy, defecation mechanisms, in conscious dogs after, 249
jejunum, limb, antiperistaltic, contractions, versus phasic, present up to 22 years postoperatively, 557
surgery, tube, percutaneous, direct, placement, technique, 173
obstruction, gynecologic contribution to, in females, 617
rectum, anastomosis, and ileum, experimental, with total colectomy, defecation mechanisms, in conscious dogs after, 249
cancer; carcinoma, and colon, metastases from, detected in small lymph nodes, by clearing method, 223
resection, curative, long term survival after, 271
surgery, using tissue expander, in association with pelvic partition, to prevent dysfunction of bladder, 300
stump, distal, edge, pursestring suture, placement, technique, new, improved, using skin staples for low anterior resection, 404
surgery, for carcinoma, using tissue expander, in association with pelvic partition, to prevent dysfunction of bladder, 300
surgery, jejunum, tube, percutaneous, direct, placement, technique, 173
rectum, cancer; carcinoma, using tissue expander, in association with pelvic partition, to prevent dysfunction of bladder, 300
Irrigation
colorectal, distal, controlled, efficient system for, 305

KIDNEY
transplantation, excision, new patterns of, in cyclosporine era, 59

LAPAROSCOPY
gasless, using planar lifting technique, 401
Ligament
vocal, function, evaluation, laryngoscopic, indirect, in patients undergoing transhiatal esophagectomy, 605
Liver
biopsy, wedge, laparoscopic, 307
blood supply, arterial, reconstruction, experimental, sleeve anastomosis, secured technique of, in transplantation of, 622
cancer; carcinoma, hepatocellular, small, complicating cirrhosis of, role of transplantation in, 379
cirrhosis, hepatocellular, small, cancer; carcinoma, transplantation, role of, 379
harvesting, without *in situ* cannulation of portal system, 626
ischemia, resection with, exceeding one hour, 454
excision, left, extended, with vascular exclusion, 288
resection, coagulation and fibrinolysis, effect on nafamostat mesilate, 498
dorsal, high, 628
stapling, technique for, 510
surgery, *ex situ*, simplified technique of, 79
resection, changes in regulating blood coagulation in, with special references to soluble thrombomodulin and protein C, 65
ischemia of, exceeding one hour, 454
vascular, hilar lobar, 6
transplantation, clinical, graft, function, early, and intraoperative hemodynamic stability in, flushing with autologous blood improves, 541
experimental, arterial reconstruction in, sleeve anastomosis, technique, secured, 622
graft, extrafascial hyper-reduction of, 139
orthotopic, reduced size, retrohepatic vena cava of, revise, use of vascular stapler, 181
living, related, portal vein graft in, 297
orthotopic, in patients with type I diabetes mellitus, 337
role of, in small hepatocellular carcinoma, complicating cirrhosis of liver, 379
tumors, hemangiomas, giant, treatment, enucleation, 49
Lungs
and heart, surgery, bypass, bleeding, persistent, pack and close approach, 353
Lymphatic system
lymph node, excision, presumed benefit, and lymph node staging, in patients with carcinoma of stomach, 38
small, metastases, detected in, by clearing method, from carcinoma of colon and rectum, 223
staging, in patients with carcinoma of stomach, and presumed benefit of lymphadenectomy, 38

MUSCLES
pyloric, surgery, technique, simple, for assuring completeness of, 303

NERVES
cranial, vagus, preservation, in esophagectomy without thoracotomy, 83

OVARY
cancer; carcinoma, tumor recurrence in, detection of, magnetic resonance imaging for, diagnostic value of, 239
pathology, development of, after hysterectomy without oophorectomy, 581
surgery, excision, hysterectomy with-

out, development of pathology of, 581

PANCREAS
diabetes, type I, orthotopic transplantation in, 337
inflammation, acute, infected retroperitoneal fat necrosis associated with, 277
experimental, acute, antibiotics bioavailability in, 475
surgery, incision, and duodenum, pylorus preserving, and Whipple procedure, standard, long term results of, comparison of, 443
Parathyroid glands
exploration, or bilateral surgical treatment of thyroid gland, oral calcium supplements, to enhance early hospital discharge after, 11
Pediatrics
diaphragm, in acute gastric volvulus, 234
surgery, Nissen fundoplication and pyloroplasty, alkaline reflux after, assessment of, 1
Pelvis
fixation, promontory, of vaginal vault, prolapse after hysterectomy, 69
surgery, extensive, blood conservation technique for, extracorporeal circulation as, 397
Penis
buried, as contraindication for circumcision, 487
Peritoneum
dialysis, catheters, laparoscopic placement of, in prior abdominal operations, 515
shunts, and pleura, management of malignant pleural effusion with, 586
Pleura
effusion, malignant, management of, with pleuroperitoneal shunting, 586
shunts, and peritoneum, in management of malignant effusions of, 586
Prostaglandin
extra-amniotic, F2α, infusion, and increasing intravenous oxytocin, for termination of second trimester missed abortion, comparative study of, 435
Prothesis
endo-, biliary, experimental, effects on, extrahepatic bile ducts, in relation to subsequent operation of biliary tract, 343

RETROPERITONEUM
fat necrosis, infected, associated with acute pancreatitis, 277
Roentgen rays
diagnosis, bile ducts, laparoscopic, through gallbladder, 175
blood vessels, arterial, catheter induced occlusion, 439
breast, carcinoma, nonpalpable, and risk factors, multiple analysis of, 149
carcinoma, suspicion, prone scintimammography, 491
lesion, stereotactic fine needle aspiration of, 54
screening, and needle-localization biopsy, five-year survival, 427

SKIN
stapler, for low anterior resection, distal rectal stump, edge, purse string suture, placement, technique, new, improved, use for, 404
Stomach
cancer; carcinoma, lymph node staging and presumed benefit of lymphadenectomy, in patients with, 38
pylorus-, oplasty, and Nissen fundoplication, alkaline reflux after, assessment of, in children, 1
pancreatoduodenectomy, preserving, and standard Whipple procedure, long term results, comparison of, 443
Surgery
blood, coagulation, regulating, changes in, in hepatic resection, with special references to soluble thrombomodulin and protein C, 65
inoculation, quantity of, in needlestick injury from suture needles, 107
care, rural, solo practice in, 25 year survey, 459
experimental, defecation mechanisms, in conscious dogs, after total colectomy, with ileorectal anastomosis, 249
effect of biliary endoprostheses on extrahepatic bile ducts, in relation to subsequent operation of biliary tract, 343
fetoscopy-guided fetal endoscopy, in sheep model, 609
pancreatitis, acute, antibiotics availability, 475
secured technique of sleeve anastomosis, of hepatic arterial reconstruction, in transplantation of liver, 622
gynecologic, and obstetric, in evaluation and treatment of iatrogenic ureteral injuries during, for nonmalignant conditions, evaluation and treatment of, 144
postoperative study, and diagnosis, recent advances in, carcinoma of esophagus, 363
angiographic catheter induced arterial occlusion, 439
biochemical study, of aponeurotic inguinal hernia repair, 595
bilateral carcinoma of breast, prognosis of patients with, 111
bile duct injury during laparoscopic and conventional cholecystectomy, 229
buried penis as contraindication for circumcision, 487
changes in regulating blood coagulation, in hepatic resection, with special references to soluble thrombomodulin and protein C, 65
chronic and recurrent appendicitis are uncommon entities often misdiagnosed, 385
clinical significance of duodenal diverticula, 257
composite dialysis access grafts, 24
critical appraisal of pathogenesis and morbidity of surgery of chronic anal fissure, 600
cryptic presentation of germ cell tumors, 261
development of ovarian pathology after hysterectomy without oophorectomy, 581
effect of nafamostat mesilate on coagulation and fibrinolysis in hepatic resection, 498
endoscopic vesical neck and uterovaginal suspension for cystocele prolapse repair, 326
extended left hepatectomy, with vascular exclusion, 288
extra-amniotic prostaglandin F2α infusion, and increasing intravenous oxytocin, for termination of second trimester missed abortion, 435
extrafascial hyper-reduction of hepatic graft, 139
flail chest as marker for significant injuries, 466
flap reconstruction of stenotic vagina, 47
five-year survival for carcinoma of breast, diagnosed by screening mammography and needle-localization biopsy, 427
flushing with autologous blood improves intraoperative hemodynamic stability, and early graft function, in clinical hepatic transplantation, 541
gynecologic contribution to intestinal obstruction in females, 617
harvesting of liver, without *in situ* cannulation of portal system, 626
hemodialysis graft salvage, 431
hepatic resection, with ischemia of liver exceeding one hour, 454
hilar lobar vascular occlusion for hepatic resection, 6
hypercoaguable states as evolving risk for spontaneous venous and arterial thrombosis, 266
indirect laryngoscopic evaluation of vocal cord function, in patients undergoing transhiatal esophagectomy, 605
influence of graft type on patency or infrainguinal arterial bypass grafts, 155
infected retroperitoneal fat necrosis associated with acute pancreatitis, 277
interleukin-2 and -6, in relation to burn wound size, in acute phase of thermal injury, 357
internal mammary artery, safe conduit for, repeat coronary revascularization, 245
lactiferous fistula, 29
long term, experience with totally

implanted catheter system, in gynecologic oncologic patients, 164
survival after curative resection for carcinoma of rectum, 271
lymph node staging, in patients with carcinoma of stomach, and presumed benefit of lymphadenectomy, 38
management, of malignant pleural effusions with pleuroperitoneal shunting, 586
of nipple discharge, 471
magnetic resonance imaging for detection of tumor recurrence, in carcinoma of ovaries, diagnostic value of, 239
metastases from carcinoma of colon and rectum, detected in small lymph nodes, by clearing method, 223
natural history of entrapment of popliteal artery, 553
new patterns of transplant nephrectomy in cyclosporine era, 59
Nissen, fundoplication and pyloroplasty, in children, alkaline reflux after, assessment of, 1
orthotopic hepatic transplantation, in patients with type I diabetes mellitus, 337
pack and close approach, to persistent postcardiopulmonary bypass bleeding, 353
pediatric diaphragm in acute gastric volvulus, 234
pelvic promontory fixation of vaginal vault, prolapse after hysterectomy, 69
portal vein graft in living related hepatic transplantation, 297
posthysterectomy prolapse of vaginal vault, repair, with abdominal sacral colpopexy, outcome of, 283
presentation and management of inflammatory aneurysms of abdominal aorta, 573
resectable and unresectable periampullary carcinoma, comparison of, 369
radical operation after portal embolization for tumor of hilar bile duct, 480
recurrence, free interval and survival, in patients with recurrent melanoma of extremities, treated with normothermic isolated perfusion, 654
reherniation after repair of abdominal wall, with expanded polytetrafluoroethylene, 613
role of transplantation in small hepatocellular carcinoma complicating cirrhosis of liver, 379
single-dose ceftizoxime versus multiple-dose cefoxitin, as prophylaxis for vaginal or abdominal hysterectomy, results of double-blind, placebo-controlled clinical trial of, 123
single-dose cefuroxime versus multiple-dose cefazolin, as prophylactic therapy, for high-risk cholecystectomy, 321
standard Whipple procedure and pylorus preserving pancreatoduodenectomy, long term results, comparison of, 443
status of deep venous system after intracaval interruption versus anticoagulation, prospective comparison of, 220
treatment of giant hemangiomas of liver by enucleation, 49
thyrotropin binding inhibitor immunoglobulins, and appearance of intrathyroidal lymphocytes, at subtotal thyroidectomy for Graves' disease, 589
22 years, versus phasic contractions present in antiperistaltic jejunal limbs, 557
reconstruction, flap, of stenotic vagina, 47
technique, abdominal closure, temporary, simplified, with latex rubber and Marlex mesh, 512
aspects, of minicholecystectomy, 624
blood conservation, extracorporeal circulation, for extensive pelvic operations, 397
closure, mass, using continuous looped polyglyconate absorbable sutures, 177
for controlling presacral bleeding, 183
efficient system for controlled distal colorectal irrigation, 305
esophagectomy without thoracotomy, vagal preservation, 83
high dorsal resection of liver, 628
improved, of needle localization biopsy of nonpalpable lesions of breast, 548
laparoscopic cholangiography through gallbladder, 175
laparoscopic wedge biopsy of liver, 307
lateral approach to proximal popliteal artery, for popliteal to anterior tibial artery bypass, 76
McCall culdoplasty, modified, at abdominal hysterectomy, 507
modified, for bedside placement of nasoduodenal feeding tubes, 407
new, improved, for pursestring suture, placement of, on edge of distal rectal stump, using skin stapler, for low anterior resection, 404
for insertion of Greenfield filter, and clinical experience with, 117
peritoneal dialysis catheters, in prior abdominal operations, laparoscopic placement of, 515
placement of double lumen Silastic catheter for hemodialysis access through cephalic vein, 171
planar lifting, gasless laparoscopy, 401
secured, experimental, sleeve anastomosis, of hepatic arterial reconstruction, in transplantation of liver, 622
simple, for assuring completeness of pyloromyotomy, 303
one-handed, to secure drains and tubes, 632
simplified, liver, *ex situ*, 79
stapling, for hepatic resection, 510
tube, jejunostomy, percutaneous, direct, placement, 173
use of vascular stapler to revise retrohepatic vena cava of reduced size orthotopic hepatic grafts, 181
Surgical pros and cons
Pp. 74-75; 75; 293; 293-295; 295-296; 503-506; 621
Surgeon's library
Galen—father of medicine, 410
Medical history of President Ronald Reagan, 86
Experimental duplication of important physical evidence of lapel bulge of jacket worn by Governor Connally when bullet 399 went through him, 517
Starch glove powder should follow talc into limbo, 185
Sutures
absorbable, polyglyconate, looped, continuous, mass closure technique, experience with, 177
needles, injury, needlestick, blood inoculation in, quantity of, 107
pursestring, placement, technique, new, improved, of edge of distal rectal stump, using skin stapler, for low anterior resection, 404

THORAX
flail, as marker for significant injuries, 466
surgery wall, excision, esophagectomy without, with vagal preservation, 83
Thrombosis
arterial, and venous, spontaneous, hypercoaguable states, evolving risk for, 266
venous, and arterial, spontaneous, hypercoaguable states, evolving risk for, 266
Thyroid glands
biopsy, ultrasound-guided, of nonpalpable and difficult to palpate masses of, 33
masses, nonpalpable and difficult to palpate; biopsy, ultrasound-guided, 33
surgery, bilateral, or exploration of parathyroid glands, oral calcium supplements, to enhance early hospital discharge after, 11
subtotal, for Graves' disease, appearance of intrathyroidal lymphocytes at, and thyrotropin binding inhibitor immunoglobulins, 589
Tissue
expander, use of, in surgical trial, 300
Transplants
grafts, composite dialysis, 24
function, early, in clinical hepatic

transplantation, and intraoperative hemodynamic stability, flushing with autologous blood improves, 541
salvage, hemodialysis, 431
kidney, excision, new patterns of, in cyclosporine era, 59
liver, clinical, graft, function, early, and intraoperative hemodynamic stability in, flushing with autologous blood improves, 541
grafts, extrafascial hyper-reduction, 139
orthotopic, reduced size, use of vascular stapler to revise retrohepatic vena cava of, 181
living, related, portal vein graft in, 297
orthotopic, in patients with type I diabetes mellitus, 337
role of, in small hepatocellular carcinoma, complicating cirrhosis of liver, 379
Trauma
chest, flail, as marker for significant injuries, 466
Tumors
germ cell, cryptic presentations of, 261
hemangiomas, giant, liver, treatment, enucleation, 49
melanoma, extremities, recurrent, recurrence-free interval and survival in, treated with normothermic isolated perfusion, 564
necrosis factor, elevated, soluble, persistently, and interlukin-1 receptor, in critically ill patients, 132
recurrence, detection, magnetic resonance imaging for, diagnostic value, in carcinoma of ovaries, 239

UTERUS
amenorrhea, post, hormone, user, and nonuser control groups, carcinoma of breast in, 167
excision, abdominal, modified McCall culdoplasty, technique for, 507
prolapse vaginal vault of, pelvic promontory fixation of, 69
without oophorectomy, development of ovarian pathology, 581
fetus, endoscopy, fetoscopy-guided, experimental, 609
injury, iatrogenic, during obstetric and gynecologic operation, for nonmalignant conditions, evaluation and treatment of, 144
pregnancy, termination, second trimester, missed, oxytocin, intravenous, increasing, and extra-amniotic prostaglandin F2α infusion for, comparative study of, 435
surgery, removal, prolapse of the vaginal vault after, repair with abdominal sacral colpopexy, outcome of, 283
suspension, vaginal, and endoscopic vesicle neck, for cystocele prolapse repair, 326

VAGINA
prolapse, after hysterectomy, pelvic promontory fixation of, 69
stenotic, reconstruction, flap, 47
surgery, colpopexy, abdominal, for repair of posthysterectomy prolapse of vault of, outcome of, 283
reconstruction, flap, 47
single-dose ceftizoxime versus multiple-dose cefoxitin, as prophylaxis for, results of double-blind, placebo-controlled clinical trial of, 123
suspension, utero-, and endoscopic vesical neck, for cystocele prolapse repair, 326
vault, prolapse, posthysterectomy, repair, with abdominal sacral colpopexy, outcome of, 283

WOUNDS
size, burn, interleukin-2 and -6, in relation to, in acute phase of thermal injury, 357
